Subject Index

Alloys
  amorphization of Mg–Zn alloys by mechanical alloying, 131
  analysis of specimen geometry effect on the creep life of Inconel alloy X-750, 33
  machined surface flaws on the high strength aluminium alloys 7075 and 2024, 53
  pitting and stress corrosion cracking behaviour of INCONEL 600 alloy in thiosulphate solution, 121
  weld metal characteristics of duplex Fe–30wt.%Mn–10wt.%Al–xC alloys, 137
Aluminium
  bending fatigue study of an austenite–ferrite dual-phase Fe–Al–Mn steel, 25
  identification of coarse dispersoids in Al–Li–Cu–Mg–Zr alloy, 171
  machined surface flaws on the high strength aluminium alloys 7075 and 2024, 53
  weld metal characteristics of duplex Fe–30wt.%Mn–10wt.%Al–xC alloys, 137
Amorphization
  amorphization of Mg–Zn alloys by mechanical alloying, 131
Austenite
  bending fatigue study of an austenite–ferrite dual-phase Fe–Al–Mn steel, 25
  evolution of dislocation structures and cyclic behaviour of a 316L-type austenitic stainless steel cycled *in vacuo* at room temperature, 83
Austenitization
  reaustenitization experiments on some high-strength steel weld deposits, 155

Bending
  bending fatigue study of an austenite–ferrite dual-phase Fe–Al–Mn steel, 25
Boron
  phase transitions in mechanically comminuted $Fe_{78}B_{13}Si_9$ amorphous ribbon, 147

Carbon
  effect of silicon on the grain size and the tensile properties of low carbon steels, 197
  weld metal characteristics of duplex Fe–30wt.%Mn–10wt.%Al–xC alloys, 137
Ceramics
  determination of residual stresses in ceramics and ceramic–metal composites by X-ray diffraction methods, 1
Comminution
  phase transitions in mechanically comminuted $Fe_{78}B_{13}Si_9$ amorphous ribbon, 147
Composites
  determination of residual stresses in ceramics and ceramic–metal composites by X-ray diffraction methods, 1
Copper
  effect of grain size on substructural evolution and plastic behaviour of copper, 97
  effect of mean stress on the low-amplitude cyclic stress–strain curve of polycrystalline copper, L1
  identification of coarse dispersoids in Al–Li–Cu–Mg–Zr alloy, 171
  two types of creep behaviour of Cu–Zn solid solution, 107
Cracking
  fatigue crack initiation and fracture in 52100 steel, 113
  microcrack propagation in fatigued f.c.c. monocrystals I: Crack-depth distribution and propagation rate, 71
  pitting and stress corrosion cracking behaviour of INCONEL 600 alloy in thiosulphate solution, 121
Creep
  analysis of specimen geometry effect on the creep life of Inconel alloy X-750, 33
  role of interfacial dislocation networks in high temperature creep of superalloys, 59
  two types of creep behaviour of Cu–Zn solid solution, 107

Damage
  low-cycle fatigue damage mechanisms of f.c.c. and b.c.c. polycrystals: homologous behaviour?, 41
Damping
  linear viscoelastic damping of two iron-base metallic materials, L5
Dislocations
  evolution of dislocation structures and cyclic behaviour of a 316L-type austenitic stainless steel cycled *in vacuo* at room temperature, 83
  role of interfacial dislocation networks in high temperature creep of superalloys, 59
Dispersoids
  identification of coarse dispersoids in Al–Li–Cu–Mg–Zr alloy, 171
Dynamic powder compaction
  dynamic powder compaction of some rapidly solidified crystalline and amorphous powders: compaction characteristics, 179

Fatigue
  bending fatigue study of an austenite–ferrite dual-phase Fe–Al–Mn steel, 25
  fatigue crack initiation and fracture in 52100 steel, 113
  low-cycle fatigue damage mechanisms of f.c.c. and b.c.c. polycrystals: homologous behaviour?, 41
  microcrack propagation in fatigued f.c.c. monocrystals I: Crack-depth distribution and propagation rate, 71
Ferrite
  bending fatigue study of an austenite–ferrite dual-phase Fe–Al–Mn steel, 25
Fracture
  analysis of fractal characteristics of fractured surfaces by secondary electron line scanning, 19
  fatigue crack initiation and fracture in 52100 steel, 113

© Elsevier Sequoia/Printed in The Netherlands

Grain size
effect of grain size on substructural evolution and plastic behaviour of copper, 97
effect of silicon on the grain size and the tensile properties of low carbon steels, 197

Iron
bending fatigue study of an austenite–ferrite dual-phase Fe–Al–Mn steel, 25
linear viscoelastic damping of two iron-base metallic materials, L5
phase transitions in mechanically comminuted $Fe_{78}B_{13}Si_9$ amorphous ribbon, 147
weld metal characteristics of duplex Fe–30wt.%Mn–10wt.%Al–xC alloys, 137

Lithium
identification of coarse dispersoids in Al–Li–Cu–Mg–Zr alloy, 171

Magnesium
amorphization of Mg–Zn alloys by mechanical alloying, 131
identification of coarse dispersoids in Al–Li–Cu–Mg–Zr alloy, 171
Manganese
weld metal characteristics of duplex Fe–30wt.%Mn–10wt.%Al–xC alloys, 137
bending fatigue study of an austenite–ferrite dual-phase Fe–Al–Mn steel, 25

Phase transitions
phase transitions in mechanically comminuted $Fe_{78}B_{13}Si_9$ amorphous ribbon, 147
Pitting
pitting and stress corrosion cracking behaviour of INCONEL 600 alloy in thiosulphate solution, 121

Rapid solidification
dynamic powder compaction of some rapidly solidified crystalline and amorphous powders: compaction characteristics, 179

Secondary electron line scanning
analysis of fractal characteristics of fractured surfaces by secondary electron line scanning, 19
Silicon
effect of silicon on the grain size and the tensile properties of low carbon steels, 197
phase transitions in mechanically comminuted $Fe_{78}B_{13}Si_9$ amorphous ribbon, 147
Specimen geometry
analysis of specimen geometry effect on the creep life on Inconel alloy X-750, 33

Spray deposition
gas velocity measurements from a close-coupled spray deposition atomizer, 207
Stainless steel
evolution of dislocation structures and cyclic behaviour of a 316L-type austenitic stainless steel cycled *in vacuo* at room temperature, 83
Steel welds
reaustenization experiments on some high-strength steel weld deposits, 155
Strain
effect of mean stress on the low-amplitude cyclic stress–strain curve of polycrystalline copper, L1
Stress
determination of residual stresses in ceramics and ceramic–metal composites by X-ray diffraction methods, 1
effect of mean stress on the low-amplitude cyclic stress–strain curve of polycrystalline copper, L1
pitting and stress corrosion cracking behaviour of INCONEL 600 alloy in thiosulphate solution, 121
Superalloys
role of interfacial dislocation networks in high temperature creep of superalloys, 59
Surface flaws
machined surface flaws on the high strength aluminium alloys 7075 and 2024, 53

Tensile properties
effect of silicon on the grain size and the tensile properties of low carbon steels, 197
Thiosulphate
pitting and stress corrosion cracking behaviour of INCONEL 600 alloy in thiosulphate solution, 121

Weld metals
weld metal characteristics of duplex Fe–30wt.%Mn–10wt.%Al–xC alloys, 137

X-ray diffraction
determination of residual stresses in ceramics and ceramic–metal composites by X-ray diffraction methods, 1

Zinc
amorphization of Mg–Zn alloys by mechanical alloying, 131
two types of creep behaviour of Cu–Zn solid solution, 107
Zirconium
identification of coarse dispersoids in Al–Li–Cu–Mg–Zr alloy, 171
